

PRO-2 PB | COMPACT PIPE BEVELLER

PRO-2 PB is a compact, handy pipe beveler that mills pipes made of carbon and stainless steel, aluminum alloys, and copper-nickels. The machine can face off and bevel pipes from inner diameters (ID) of 19.5 mm (0.77") to outer diameters (OD) of 48 mm (1.89").

Small pipes from ID 15.5 mm (0.61") up to OD 29 mm (1.14") can be beveled with optional small mandrel set.

PRO-2 PB is able to mill also larger pipes from ID 38 mm (1.50") up to OD 60.3 mm (2.37") by means of an optional extension set.

Its exceptionally narrow housing (only 48 mm wide) makes it perfectly suited to space restricted areas such as boiler water walls.

PRO-2 PB incorporates overload systems incl. wet multi-disk friction clutch to prevent gear damage if the tool gets stuck.
